About Global Business Insights Award Program Methodology: Ensuring that the award evaluation process is neutral and valid, is a key priority and as a consequence votes are gathered year-round via a number of digital channels and then evaluated employing a transparent and dynamic framework. For each of the awards programs we utilise quantitative and qualitative studies which have been conducted by our experienced research teams and by measuring each business against a precise set of appraisal criteria, we have created a unique model which assures the validity of our results. The criteria and sub-criteria offer a robust set of requirements that are then used as the methodology to not only benchmark but also create a depth of understanding amidst the participating businesses, ultimately allowing us to ensure that we capture different dimensions of the same phenomenon.
